2023 Automotive Orientation Day
Wednesday, March 8

The name in the panel assignment is only a place holder for each company. Each industry representative attending AOD will receive a name tent. Each company in the 6-panel sessions can decide which representative they want to have sit in a panel session. Last-minute substitutions are normal, and the automotive department does not need to be notified if a company decides to switch industry representatives sitting on the panel sessions. All 6 panel sessions will be going on at the same time and the first round starts at 9:15am and the second round starts at 10:30 am. Companies will stay in the room assigned for each panel session and the students will change rooms in between sessions.
